KUBENDIRAN M

Computer Science (AI) Undergraduate | Aspiring Software Developer & AI Engineer

Chennai, India • Phone: +91-9344715210 • Email: kuben3456@gmail.com
LinkedIn: linkedin.com/in/m-kubendiran-2546702b5 • GitHub: github.com/Kube030106

PROFESSIONAL SUMMARY

Motivated Computer Science (Artificial Intelligence) undergraduate with a strong foundation in full-stack web development, computer vision, and machine learning. Demonstrated success in architecting interactive AI applications, real-time facial recognition systems, and IoT sensor solutions. Seeking an entry-level Software Developer or AI Engineering role to create impactful, high-performance technology products.

EDUCATION

B.E. Computer Science & Engineering (Artificial Intelligence)

Sathyabama Institute of Science & Technology, Chennai | 2023 – 2027 (Expected) | ***CGPA: 8.6 / 10.0***

- Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Computer Vision, Database Management Systems, Operating Systems, Computer Networks.

Higher Secondary Certificate (12th Grade)

Aditya Vidyashram | 2023 | ***Score: 73%***

Secondary School Certificate (10th Grade)

Aditya Vidyashram | 2021 | ***Score: 86%***

TECHNICAL & CORE SKILLS

Programming Languages:	Python, Java, C, SQL
Web & Frontend:	ReactJS, REST APIs
Databases & Cloud:	PostgreSQL, Supabase
Libraries & Frameworks:	OpenCV, Computer Vision
Tools & Systems:	Git, GitHub, VS Code, Arduino IDE
Core Concepts:	Data Structures & Algorithms, OOP, OS, Computer Networks, ML, Computer Vision, IoT
Soft Skills:	Problem Solving, Communication, Leadership, Time Management, Agile Collaboration
Languages Known:	English (Professional), Tamil (Native), Telugu (Conversational Speaking)

EXPERIENCE

Software Developer Intern — Rudhra Info Solutions, Chennai

Duration: 1 Month | Full-Stack & Python Web Development

- Developed responsive front-end user interfaces using HTML5, CSS3, and JavaScript, ensuring seamless cross-browser compatibility.
- Integrated Python-backed business logic and executed rigorous debugging to resolve UI/UX and functional bugs.
- Maintained disciplined version control workflows utilizing Git and GitHub for feature branch staging and peer code reviews.

KEY PROJECTS

DataTalk – Natural Language Text-to-SQL & Dynamic Visualization | *ReactJS, Plotly, Supabase, Tailwind CSS*

- Built an intuitive interface translating plain-English business queries into executable PostgreSQL commands.
- Engineered automated dynamic data visualizer rendering real-time Plotly charts and exportable analytical summaries.

Student Identification System using ArcFace | *Python, OpenCV, DeepFace (ArcFace), Flask*

- Developed high-precision facial recognition pipeline using additive angular margin loss (ArcFace) for biometric student ID.
- Achieved rapid sub-second verification latency and resilient matching across varying lighting angles and poses.

Real-Time Face Recognition Web System | *Python, OpenCV, Flask*

- Designed multi-threaded real-time video surveillance dashboard with automated face registration, feature extraction, and logging.

Startup Unicorn Prediction System | *Python, Pandas, NumPy, Scikit-learn*

- Trained supervised machine learning classifier evaluating venture funding rounds, market size, and momentum indicators.

Weather Sync – IoT Environmental Monitoring System | *Arduino, C++, DHT22, Sensors*

- Fabricated embedded hardware station recording real-time ambient temperature and humidity with automated LED alert triggers.

CERTIFICATIONS

- **NPTEL:** Database Management Systems (DBMS) – Relational modeling, normalization, indexing, and SQL optimization.
- **HCL (GUVI):** JavaScript Programming – Modern ES6+, DOM manipulation, asynchronous architecture, and REST API integration.
